## Beauty Spot: pH Advantage Miracle Skin Plumper

*Health & Beauty*

With winter weather playing havoc with our skin, we review a new 'Miracle Skin Plumper' which promises to instantly plump and hydrate our skin...

As skin ages, it loses moisture, leaving it dry, tired and wrinkled. It doesn't help at this time of the year, when central heating and cold weather dry it out further.

**pH Advantage AM/PM Hyaluronic Infusion** is a "next generation moisturiser" with a high concentration of Hyaluronic Acid which helps to improve the overall health of the skin. It contains the maximum amount of Hyaluronic Acid of 45% in non prescription form, which can hold 100 times its weight in water.

A thin serum, you only a small amount over the face after applying SPF or other moisturiser. The serum immediately plumps the face. pH Advantage AM/PM Hyaluronic Infusion can be used under makeup for a smoother complexion, or before a night out, for a quick lift.

**Our tester's verdict:** "After a week of testing pH Advantage AM/PM Hyaluronic Infusion, my face did look less dry and patchy. The more severe dry areas around my nose (from a previous cold) were still visible, but my forehead was much smoother and far more even. I'm definitely going to keep using it throughout the winter."
